NERVE HEALTH

NERVE HEALTH

★ VITAMIN D

Vitamin D enhances the production of NERVE GROWTH FACTOR (NGF), essential for the development and maintenance of neurons.

Neurotransmitter Synthesis: It contributes to the synthesis of important neurotransmitters such as serotonin, dopamine, and norepinephrine. These neurotransmitters are essential for mood regulation and cognitive function.

★ VITAMIN (B1, B6, B12)

Production and maintenance of the myelin sheath, which insulates nerve fibers and facilitates rapid signal conduction and nerve communication

★ MAGNESIUM

Magnesium's effects on arteries are multifaceted. It interacts with calcium channels, influencing muscle tone in blood vessel walls. Its anti-inflammatory properties help combat the underlying processes that contribute to arterial damage.
